

Flight Game Development

Sijie Meng

1. Game demand design and analysis

(1) Start

- Gameplay scene
- Status bar (pause key, life value, score)
- Pause window (resume key, back to home key)
- Gameover scene (tap to restart game)

(2) Settings

- Turn on / turn off background music
- Turn on / turn off sound

(3) Help

- Information about how to use the game

(4) Development conditions

- Development language: python
- Development environment: MacOS
- Development tools: pycharm

2. Game project initialization

(1) Add resource file

- Image
- Sound

(2) Add package

- Particle
- Scene
- Sprite
- Utility

(3) Add configuration file

- Config.ini

(4) Tools module implementation

- Utility.tools.py

(5) Particle system implementation

- Particle.big_explosion.py

- Particle.fighter_fire.py
- (6) Game startup module implementation
- Game_main.py

3. Loading Scene Implementation

- (1) Create loading scene
- Scene.loading_scene.py
- (2) Add loading layer
- (3) Loading animation implementation

4. Home scene implementation

- (1) Create home scene
- Scene.home_scene.py
- (2) Add home layer
- (3) Add main menu

5. Setting scene implementation

- (1) Create setting scene
- Scene.setting_scene.py
- (2) Add setting layer
- (3) Add main menu

6. Help scene implementation

- (1) Create help scene
- Scene.help_scene.py
- (2) Add help layer
- (3) Add main menu

7. Gameplay scene implementation

- (1) Create gameplay scene
- Scene.gameplay_scene
- (2) Generate enemy sprite
- Sprite.enemy_sprite.py

- (3) Generate player sprite
 - `Sprite.fighter_sprite.py`
- (4) Generate bullets sprite
 - `Sprite.bullet_sprite.py`
- (5) Initialization gameplay scene
- (6) Gameplay scene menu implementation
- (7) Player shooting bullets implementation
- (8) Collision detection between bullets and enemies
- (9) Collision detection between player and enemies
- (10) Update status bar

8. Gameover scene implementation

- (1) Create gameover scene
 - `Scene.gameover_scene.py`
- (2) Add gameover layer
- (3) Add main menu

9. Game result show

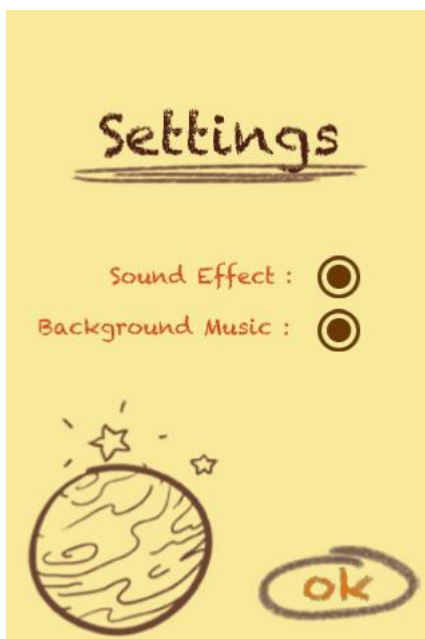

- (1) Loading scene

- (2) Home scene

(3) Setting scene

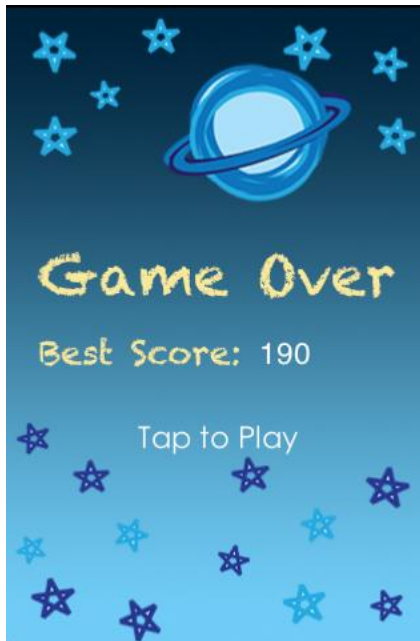

(4) Help scene

(5) Gameplay scene

(6) Gameover scene

(7) Logger

```
Run: game_main
/Users/mengsijie/Desktop/FlightGame/venv/bin/python /Users/mengsijie/Desktop/FlightGame/game_main.py

```

10. Summary

I have implemented all the functions in the game design, which includes the game interface and material production, python code implementation, background music and sound production. The legacy issue is the adaptability between the cocos2d coordinates and the retina display of the MacOS system.
